

(Unclassified // FOUO)  
CSWC Operational Period Summary  
0600 February 20 2018 to 1800 February 20 2018

The San Gabriel Mountains National Monument received approximately 1 inch of snow on the ground on Monday, 02/18/18, with more snow forecast due to a passing winter storm system that is impacting California through the end of the week. The system is predicted to produce record setting low temperatures and low snow levels.

Normal Operations	Normal Operations	Normal Operations	Normal Operations

#### Cal OES COASTAL REGION

- Nothing significant to report.

#### Cal OES INLAND REGION

- Nothing significant to report.

#### Cal OES SOUTHERN REGION

- Nothing significant to report.

## **FIRE ACTIVITY**

### **Cal OES Fire Preparedness Levels**

<b>National</b>	<b>Northern California</b>	<b>Southern California</b>
<b>Preparedness Level 1</b>	<b>Preparedness Level 1</b>	<b>Preparedness Level 2</b>
	<b>Multi-Agency Coordination System MACS Mode: 1</b>	<b>Multi-Agency Coordination System MACS Mode: 1</b>

**Please note: The National and Regional Preparedness Levels are maintained by the National Multi-Agency Coordination (MAC) Group and are separate from Cal OES activation levels.**

#### **Pleasant, Vegetation Fire, Inyo County**

Location: Pleasant Valley Dam Rd. x Hwy 395, Northeast of Bishop

Jurisdiction: State DPA, SRA, San Bernardino-Inyo-Mono Unit

Per Cal OES Fire Duty Officer (FDO) and ICS-209 as of 02/20/18 at 1816 hours:

- Cal Fire San Bernardino Unit in Unified Command with Inyo County Sheriff (ICSO)
- 2,275 acres, 50% contained
- 2 structures damaged
- Minimal fire activity with the majority of activity being interior smoldering

#### **Activations**

- There are no EOC activations at this time

#### **Deployments**

- 1 Public Safety Communications Technician (PSCT) assigned

#### **Resources Assigned**

- 1 Cal OES Type 3 S/T

# **FIRE ACTIVITY**

## **State Assistance Request**

- None at this time

## **Mandatory Evacuations**

- Per the Cal OES Law Duty Officer (LDO) and Cal OES SDO at 1512 hours on 02/19/18, Inyo County Sheriff's Office (ICSO) advised that all evacuations have been lifted, except for those in the area of 5 Bridges and Fish Slough, which is unoccupied by residents and has no power.
  - The Cal OES Law Enforcement Branch continues to monitor and will advise if there are any changes

## **Shelter**

- American Red Cross (ARC), Eastern Sierra Tri-County Fairgrounds, 1234 Fair St., Bishop ([Closed 02/19/18](#))

## **Access and Functional Needs**

- Per the Cal OES SDO as of 0936 hours, ICSO advised there were no disabled access and functional needs issues.

## **Critical Infrastructure**

- Per California Utilities Emergency Association (CUEA) as of 1725 hours on 02/19/18, Southern California Edison (SCE) advises:
  - 1 Sub Transmission 55 kV Sub Line is threatened
  - 2 Sub Distribution 12kV Lines are threatened
  - Total of 31 poles were damaged, power outage is affecting approximately 800 customers
  - Power is expected to be restored by noon on Tuesday, 02/20/18
  - An SCE representative is on scene and will provide updates at they become available

## **Road Closures**

- Pleasant Valley Reservoir Rd.
- Brockman Ln. North of 395
- 5Bridges Rd. at Jean Blanc
- Dixon Ln. West toward Brockman

## **Law Enforcement**

- Assisting Law Enforcement: Bishop PD, Mammoth PD, Mono County Sheriff's Office and CHP

# MAJOR ROAD / HIGHWAY / BRIDGE CLOSURES

### 911 Outages/Remote/Community Isolations:

- None reported.

### Service Interruptions:

- None reported.

# WEATHER OF CONCERN

## Weather of Concern

- A Pacific Trough will produce light rain and snow showers for portions of Northern California and record low temperatures for Southern California, today through Thursday, 02/22/18.

## **Active Weather Warnings, Watches and Advisories by County:**

- <https://alerts-v2.weather.gov/counties/CA>

# **WEATHER SYNOPSIS BY REGION**

## **NORTHERN CALIFORNIA**

An unsettled and weather pattern will affect the region through the rest of the month. Periods of precipitation, better mixing and cooler than normal temperatures will be the main weather impacts during this period.

A series of shortwave Pacific troughs will move over the area and provide periods of lighter rain and snow showers. The first system will impact the region tonight and Wednesday with a secondary dose of precipitation Wednesday night into Thursday. Another wave is expected later during the weekend into early next week. Peak liquid water amounts will generally range between 0.3 to 0.6" with each main system passage. The Sacramento Valley and portions of the Bay area look to receive lesser amounts due to the path of the trough passages. The wind flow will be lighter today and Wednesday but will increase Thursday and Friday. Peak winds should occur Thursday night during the main cold frontal passage with potential gusts between 40 to 50 mph and possibly more for portions of the Sacramento Valley and higher ridges across the greater Bay area. Lighter winds should return Saturday before another frontal passage late weekend or early next week. Humidity levels don't appear to be unusually low during the next several days including the stronger wind period. Temperatures will be on the cool side with hard freezing in areas once again tonight. High temperatures should be below normal each of the next 7 days.

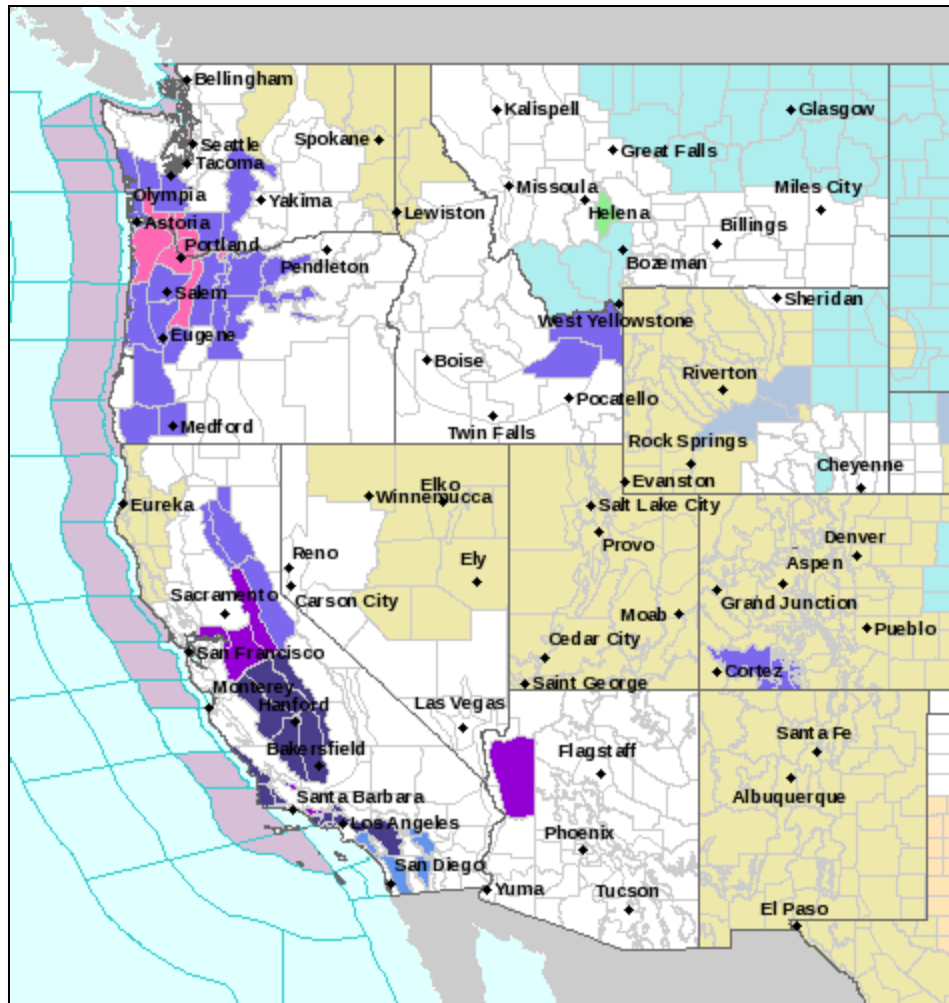

Confidence is pretty solid for the overall pattern shift. This means more precipitation and cooler weather compared to the first two weeks of the month. Timing of the system impacts will most likely change, especially for the weekend and early next week period due to the progressive nature to the atmospheric pattern.

## **SOUTHERN CALIFORNIA**

A deep trough over the West Coast will maintain well below normal temperatures across the region through Friday, with mid 30s to mid 40s across the mountains and 50s to low 60s in the valleys. A couple of weak disturbances in the trough will drop south from Canada bringing scattered showers to the region Wednesday through Friday. Most locations will receive less than a quarter inch of total rainfall with these two disturbances. The snow level will be around 3,000 feet. Westerly winds of 20 to 40 mph with gusts to 60 mph will surface across the wind prone mountain and desert areas Thursday. The trough over the West Coast will weaken causing temperatures to warm this weekend, but temperatures will still be a little below normal. Temperatures will become well below normal early next week as the trough strengthens over the West Coast once again. Another disturbance will drop down from Canada bringing scattered showers with light rainfall totals early next week. Snow levels look to remain around 3,000 feet.
